iON provides a comprehensive solution that addresses varied IT requirements of your organization. From hardware, network to ERP, iON offers a single service, in a pay-as-you-use model, allowing you to leverage the solution's true potential as your business grows. iON ensures integration of all processes along with ease of use of the software.

You gain from:

**Integrated solutions**
We offer a single service IT with a pre-integrated suite of hardware, network, software and services. We ensure that your functions are digitized, automated and connected. For example, if you are using a CRM solution along with a time & attendance application, and have a document management system to organize supporting files and an HRMS, we ensure that these applications are connected and work as one. So for you, it is simply one IT for multiple applications. Integrated applications thus provide a comprehensive view of business enabling better decisions.

**Increased agility**
We bring in the agility to keep pace with changing processes in a serene line of business. We help you configure the processes to see how you currently do or the software recommends and allows you to choose industry best practices based on your business parameters. The solution gives you increased convenience allowing you to perform virtual tasks from your remote location, no matter where you are. Increased agility thus is mainly for IT and not multiple applications. Integrated applications thus provide a comprehensive view of business enabling better decisions.

**Personalized solutions**
Although iON is a cloud service, the software is customizable to suit your business. You will always have the freedom of your business by picking and choosing what processes you would need. Furthermore, the multilingual capability of the software allows you to customize the solution label names to read in vernacular languages (Hindi, Marathi, Tamil etc) enabling users to learn and operate the solution with ease.

**Automatic upgrades**
We continuously invest in our solutions to incorporate best practices. The software is constantly enriched based on user feedback and industry and statutory changes. You will get the upgrades without disrupting your business operations or any additional cost. Being a perpetual beta ensures that there is no technology obsolescence.

**Enhanced Business Continuity**
Our solution offers optimal performance in normal broadband connectivity along with a stringent security mechanism to ensure your data privacy is maintained. The capacity of the solution grows with your increasing computing needs and reduces the need for IT staff.

The solution as a result is flexible as the no one works from fixed booting up data centers in the event of a disaster, ensuring continuity of business operations.

**Why iON**

We ensure that your functions are digitized, automated and connected. For example, if you are using a CRM solution along with a time & attendance application, and have a document management system to organize supporting files and an HRMS, we ensure that these applications are connected and work as one. So for you, it is simply one IT for multiple applications. Integrated applications thus provide a comprehensive view of business enabling better decisions.

A pay-as-you-use model
Our cloud eliminates capital investment upfront as no capital expenditure is required when you choose iON. The IT infrastructure and software can scale in line with the duration of the contract.

Additionally, you enjoy the hallmarks of a subscription model with no capital investment. Typically, the IT investment is within three months, where best practices are well followed.

**How iON works**

The solution is resilient to failures as the service works on a distributed model, ensuring continuity of business operations or any additional cost. Being in perpetual beta ensures that there is no technology obsolescence.

The solution as a result is flexible as the no one works from fixed booting up data centers in the event of a disaster, ensuring continuity of business operations.
Today, the educational sector is abuzz with a noted increase in the number of campuses, student enrollment and digital learning platforms. With such a high increase in the numbers, institutions have to optimize resources by adopting standardized systems and procedures. With campus efficiency being the new catchphrase, collaborative tools and effective learning content management systems are the definite need of the hour.

While institutions foresee this need for change, there can also be a resistance to automate academic back office processes. To address this, Tata Consultancy Services (TCS), offers the iON Education Solution — a suite of IT offerings designed to help educational institutions manage their campuses efficiently and with greater success. These offerings help in streamlining core and support functions as well as in managing institutional resources to achieve improved accountability and transparency, while attracting students and the best faculty.

The iON suite of offerings is modular in nature, that means it can automate certain functions within your institution depending on preference and suitability. This enables the institution to be ahead of the curve through swift and sure IT implementation across the board. One of the greatest advantages of the iON solution is faster configuration and its plug and play nature. It prompts customer involvement during the configuration process and also allows provisioning for additional solutions and services to be added at a later stage.

Overview

Educational Institutions of today face several challenges ranging from the need of attracting faculty and students, to enroll and retain them on an day-to-day basis.

While institutions foresee this need for change, there can also be a resistance to automate academic backoffice processes. To address this, Tata Consultancy Services (TCS), offers the iON Education Solution — a suite of IT offerings designed to help educational institutions manage their campuses efficiently and with greater success. These offerings help in streamlining core and support functions as well as in managing institutional resources to achieve improved accountability and transparency, while attracting students and the best faculty.

The iON Education Solution comprises four offering plus specific add-ons.
iON provides a comprehensive solution that addresses vital IT requirements of your organization. From hardware, network to ERP, iON offers a single service, in a pay-as-you-use model, allowing you to leverage the solution's true potential as your business grows. iON ensures integration of all processes and connects the various components of the software.

You gain from:

1. Integrated solutions: We offer a single IT service with a pre-integrated suite of hardware, network, software and services. We ensure that your functions are deployed, automated and connected. For example, if you are using a CRM solution along with a ERP (e.g manufacturing), and have a document management system to store data in perpetuity, we ensure that these applications work together seamlessly. It is so easy to integrate multiple applications. Integrated applications provide a comprehensive view of business enabling better decisions.

2. Increased agility: We bring in the agility to keep pace with changing processes on a case by case basis. We help you configure the processes to work as you currently do or the software recommends and allows you to choose industry best practices based on your processes. Increased agility and convenience allowing you to perform virtual tasks from your mobile devices, no matter where you are. Being continually compliant with statutory requirements, the solution ensures your company is always audit ready and legally compliant.

A pay-as-you-use model:

Our model eliminates capital expenditure up front as well as implementation of IT infrastructure and software on rent for the duration of the contract. Additionally, you only pay for the number of users who actually use the software. Thus, you pay only for a monthly license which includes maintenance and training. Typically, the ROI exceeds within only three months, when these practices are followed after.

3. Personalized solutions: Although iON is a cloud service, the software is customizable to each business. You will always have the flavor of your business by picking and choosing what processes you embedded. Furthermore, the multilingual capability of the software allows you to customize the solution label names to read in vernacular languages (like Hindi, Marathi, Tamil etc) enabling users to learn and configure to each business. You will always get the upgrades without disrupting your business operations or any additional cost. Being in perpetual beta ensures that there is no technology obsolescence.

4. Automatic upgradations: We continuously invest in our solutions to incorporate industry best practices. The software is constantly enriched based on our feedback and industry and statutory changes. You will get the upgradations without disrupting your business operations or any additional cost. Being perpetual beta ensures that there is no technology obsolescence.

5. Enhanced Business Continuity: Our solution offers optimal performance in normal broadband connectivity along with a stringent security mechanism to ensure your data privacy is maintained. The capacity of the solution grows with your increasing computing needs and reduces the need for, if any, staff. The solution is resilient to failures as the service works from back-up data centers in the event of a disaster, ensuring continuity of business operations.

About Tata Consultancy Services Ltd (TCS):

Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world’s largest enterprises to tap the full potential of IT for their competitive advantage. Tata Consultancy Services helps its clients accelerate their digital transformation initiatives by leveraging a best-in-class blended delivery model that brings together domain and industry-specific expertise in high-end consulting, cloud, software, business process services, technology and onshore-offshore delivery models.

We help you configure the processes to work as you currently do or the software recommends and allows you to choose industry best practices based on your business parameters. The solution gives you increased configuration to each business. You will always have the flavor of your business by picking and choosing what processes you install. Furthermore, the multilingual capability of the software allows you to customize the solution label names to read in vernacular languages (Hindi, Marathi, Tamil) enabling users to learn and operate the solution with ease.

10. Security and Privacy: Our solution offers optimal performance in normal broadband connectivity along with a stringent security mechanism to ensure your data security is maintained. The capacity of the solution grows with your increasing computing needs and reduces the need for IT staff. The solution is designed to be scalable as the service works from back-up data centers in the event of a disaster, ensuring continuity of business operations. The solution is resilient to failures as the service works from back-up data centers in the event of a disaster, ensuring continuity of business operations.

11. Automatic upgrades: We continuously invest in our solutions to incorporate best practices. The software is constantly enriched based on user feedback and industry and statutory changes. You will get the upgrades without disrupting your business processes or any additional cost. Being perpetual beta ensures that there is no technology obsolescence. Automatic upgrades will get the upgrades without disrupting your business processes or any additional cost. Being perpetual beta ensures that there is no technology obsolescence.
